Azure Services Poster

Not all the Services shown are Generally Available. Some are either just announced, or in Preview. Refer to the Azure Documentation for the latest status on availability

Azure Services - Networking

ImageUrl	Service	Title
	Azure Virtual WAN	Azure managed Hub & Spoke service for Networks, to centralise network, security and routing functionalities
	Azure Virtual Network	Building block for private network in Azure to host VMs, connectivity to on premise Networks
	Azure Firewall Manager	Centralised Security Policy & Route Management for Cloud based Security Perimeters
	Azure Internet Analyzer	Client-side measurement platform to test impact of networking infrastructure changes on performance
	Azure Firewall	Cloud Native, Firewall as a Service with built in High Availability and Scalability
	Azure ExpressRoute	Dedicated Fiber network based connectivity to Azure from on premise Networks
	Azure Traffic Manager	DNS based Traffic load balancer that can work across Azure Regions based on Routing rules
	Azure VPN Gateway	Encrypted cross-premises connections to Azure VNets from on-premises locations, or other Azure VNets
	Azure DNS	Hosting service for DNS domains to provide name resolution using Azure infrastructure
	Azure Load Balancer	Layer 4 Load balancer that can balance requests within and across AZ, and Global Regions
	Azure Front Door	Load balance & route HTTPS requests to Applications deployed across global Azure regions
	Azure Application Gateway	Load balance HTTPS requests to Applications deployed within an Azure region
	Azure Private Link	Private access to services hosted on Azure and keeps communication within Azure backbone network
	Azure Bastion	Private and fully managed RDP and SSH based access to Virtual Machines in Azure

Azure Services - Security

ImageUrl	Service	Title
	Azure Defender for IoT	Asset Management & Threat detection for managed and unmanaged IoT Devices
	Azure Active Directory	Cloud based Identity & access Management Service
	Azure Sentinel	Cloud native SIEM & intelligent Security Analytics to protect the Enterprise
	Azure Web Application Firewall	Cloud native WAF Service that provides protection to Web Applications
	Azure Defender	Cloud security posture management and workload protection on Azure
	Azure Information Protection	Control & secure email, documents, sensitive data both inside and outside Company walls
	Azure key Vault	Create and maintain keys,secrets,Certificates that access and encrypt your cloud resources, apps
	Azure AD External Identities	Enables Organizations to manage external users from Customers and Partners
	Azure Dedicated HSM	HSM Appliance for Cryptographic Key storage in Azure using most stringent security requirements
	Azure AD Domain Services	Join Virtual Machine to a Domain without installing Domain Controllers
	Azure DDoS Protection	Protect applications in Azure Virtual Network from distributed denial of service attacks
	Azure Security Center	Unified security management and advanced threat protection across hybrid cloud workloads
